INDEX TO VOLUME 81

"Starred items are Shorter Notes"

Abe, Kinetsu. *A characterization of totally geodesic hypersurfaces of S^{n+1} and CP^{n+1}*, 603.

Andrade, J. F. and Simis, A. *A complex that resolves the ideal of minors having $n-1$ columns in common*, 217.

Andrews, George E. and Askey, Richard. *Another q-extension of the beta function*, 97.

Archbold, R. J. *A counterexample for commutation in tensor products of C^*-algebras*, 562.

Arrate, M. *A uniqueness criterion for ordinary differential equations in Banach spaces*, 421.

Askey, Richard. See Andrews, George E.

Aull, C. E. *Approximation of continuous functions on pseudocompact spaces*, 490.

Aziz, Abdul and Mohammad, Q. G. *Growth of polynomials with zeros outside a circle*, 549.

Azoff, Edward A. *Spectral multiplicity for tensor products of normal operators*, 50.

Azumaya, Goro. *Fixed subalgebra of a commutative Frobenius algebra*, 213.

Baillon, J. B. and Schöneberg, R. *Asymptotic normal structure and fixed points of nonexpansive mappings*, 257.

de Bartolomeis, Paolo. See Bedford, Eric.

Bass, Charles D. *Some products of topological spaces which are manifolds*, 641.

Bedford, Eric and de Bartolomeis, Paolo. *Levi flat hypersurfaces which are not holomorphically flat*, 575.

Beran, Ladislav. *Extension of a theorem of Gudder and Schelp to polynomials of orthomodular lattices*, 518.

Berkson, Earl. *Composition operators isolated in the uniform operator topology*, 230.

Berner, Andrew J. *Spaces with dense conditionally compact subsets*, 137.

Block, Louis. *Stability of periodic orbits in the theorem of Šarkovskiĭ*, 333.

Borges, Carlos R. *A stratifiable k_R-space which is not a k-space*, 308.

Bourgain, J. *On the Dunford-Pettis property*, 265.

Bourgain, Jean and Talagrand, Michel. *Dans un espace de Banach reticulé solide, la propriété de Radon-Nikodým et celle de Krein-Milman sont équivalentes*, 93.

Boyer, D. and Rangaswamy, K. M. *Intersections of pure subgroups in abelian groups*, 178.

Brosowski, Bruno and Deutsch, Frank. *An elementary proof of the Stone-Weierstrass theorem*, 89.

Brown, William C. and Glaz, Sarah. *Some counterexamples concerning a differential criterion for flatness*, 505.

Bunce, John W. *The similarity problem for representations of C^*-algebras*, 409.

Burke, Dennis K. *Construction of spaces with a σ-minimal base*, 329.

Burke, D. K. and Davis, S. W. *Compactifications of symmetrizable spaces*, 647.

Cartwright, Donald I., Howlett, Robert B. and McMullen, John R. *Extreme values for the Sidon constant*, 531.

Charalambous, M. G. *Inductive dimension and inverse sequences of compact spaces*, 482.

Cheatham, Thomas J. and Stone, David R. *Flat and projective character modules*, 175.

Cheng, Jih-Hsin. *An integral formula on the scalar curvature of algebraic manifolds*, 451.

Chicone, Carmen and Swanson, R. C. *A generalized Poincaré stability criterion*, 495.

*Choda, Marie. *The states associated with approximately inner automorphisms*, 343.

*Cohen, Joel E. *Convexity of the dominant eigenvalue of an essentially nonnegative matrix*, 657.

Cook, R. J. *An upper bound for the sum of large differences between prime numbers*, 33.

Corwin, Lawrence and Greenleaf, Frederick P. *Rationally varying polarizing subalgebras in nilpotent Lie algebras*, 27.

Croke, Christopher. *The first eigenvalue of the Laplacian for plane domains*, 304.

Dannon, Victor. *Integral characterizations and the theory of curves*, 600.

Darst, Richard B. *Convergence of L_p approximations as $p \longrightarrow \infty$*, 433.

Davis, Chandler. *Beyond the minimax principle*, 401.

Davis, S. W. See Burke, D. K.

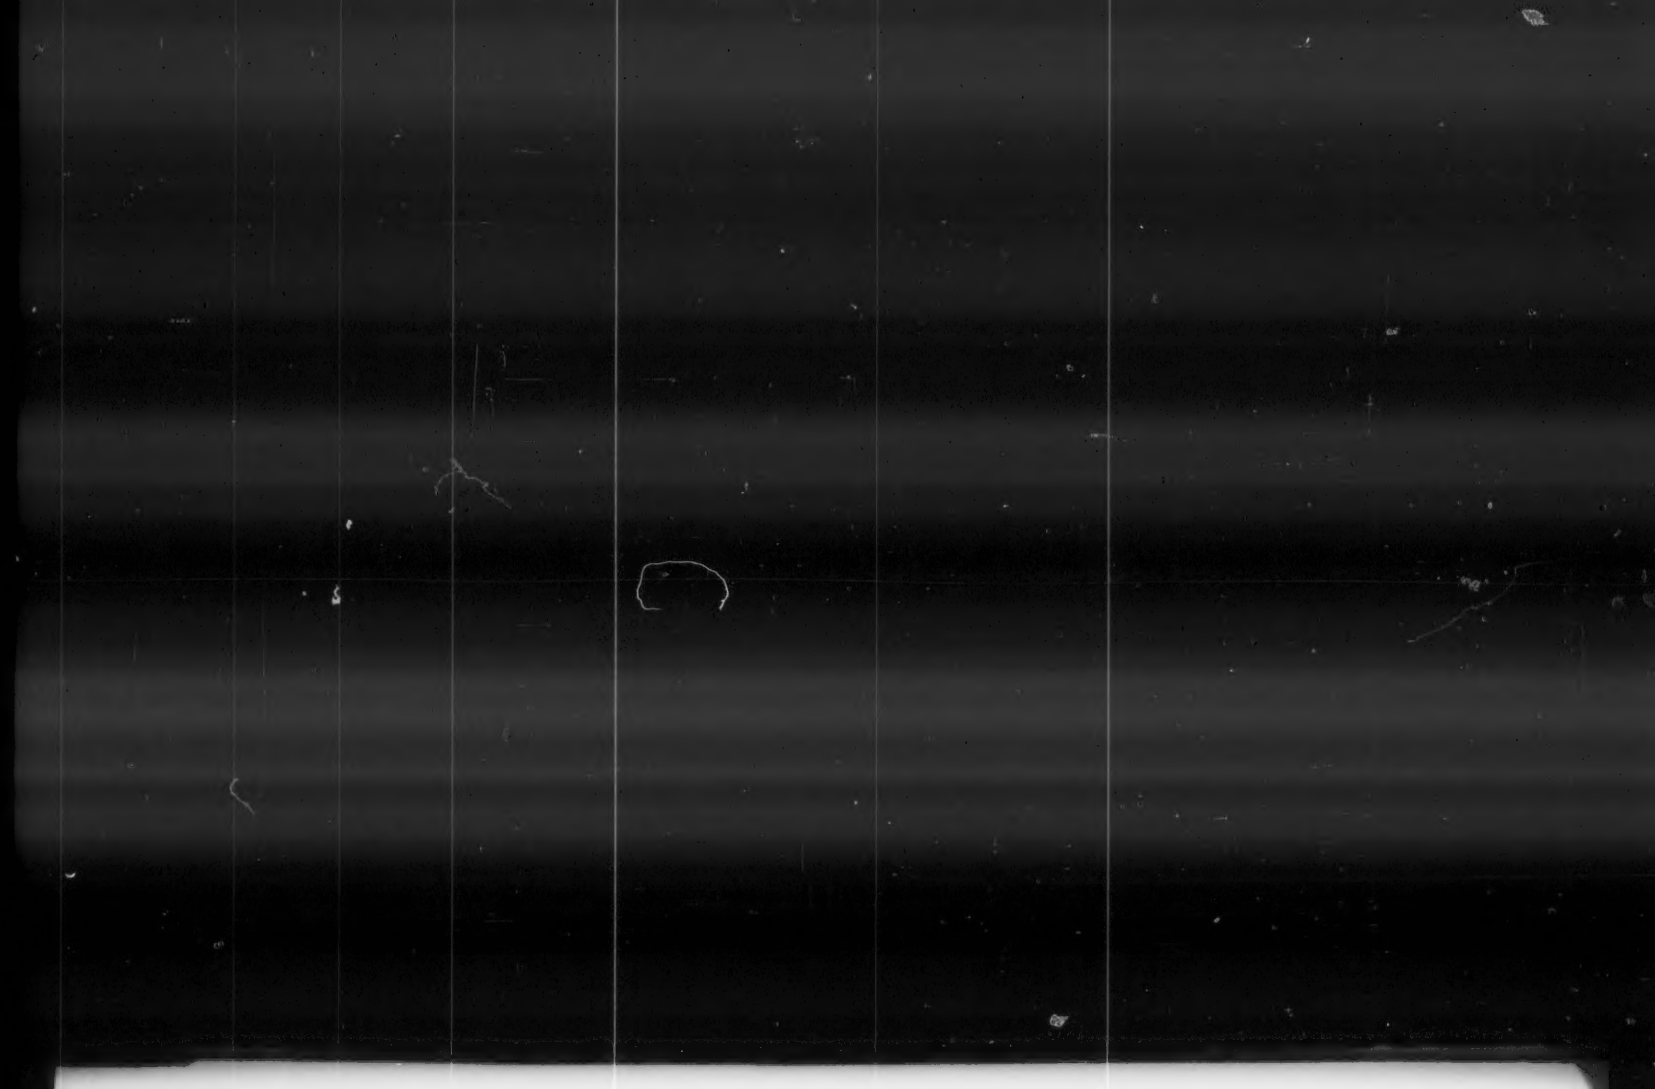
Day, Mahlon M. *A geometric variant of Bade's theorem on dominating measures*, 554.

Deutsch, Frank. See Brosowski, Bruno.

Deveney, James K. and Mordeson, John N. *Calculating invariants of inseparable field extensions*, 373.

Diamond, Harvey, Kon, Mark and Raphael, Louise. *Stable summation methods for a class of singular Sturm-Liouville expansions*, 279.

*van Douwen, Eric K. and van Mill, Jan. *$\beta\omega - \omega$ is not first order homogeneous*, 503.
Dow, Alan. *Absolute C^*-embedding of extremally disconnected spaces*, 636.
Du, Bau-Sen. *A note on periodic solutions in the vicinity of a center*, 579.
Dutta, M. See Tewari, U. B.
Dyer, Micheal N. *Simple homotopy types for (G, m)-complexes*, 111.
Ellers, Erich W. *Relations in hyperreflection groups*, 167.
El-Neweihi, Emad and Proschan, Frank. *Unified treatment of some inequalities among ratios of means*, 388.
Eplett, W. J. R. *An additive representation for real functions on the product of a set and a lattice*, 23.
Evans, Ronald J. *Generalized cyclotomic periods*, 207.
Farkas, Daniel R. and Snider, Robert L. *Locally finite-dimensional algebras*, 369.
Feichtinger, Hans G. *A characterization of minimal homogeneous Banach spaces*, 55.
Fenton, P. C. *The minimum of small entire functions*, 557.
Foata, Dominique. *Further divisibility properties of the q-tangent numbers*, 143.
*Foged, L. *A countable k-space that is not stratifiable*, 337.
Foran, James. *On extending the Lebesgue Integral*, 85.
Freiria, A. A. See Izé, A. F.
Furuta, Takayuki. *An extension of the Fuglede-Putnam theorem to subnormal operators using a Hilbert-Schmidt norm inequality*, 240.
Gagliardi, Carlo. *Extending the concept of genus to dimension N*, 473.
Gardner, R. J. and Gruenhage, G. *Finite Borel measures on spaces of cardinality less than c*, 624.
Ghoussoub, Nassif and Saab, Elias. *On the weak Radon-Nikodym property*, 81.
Glaz, Sarah. See Brown, William C.
Golan, Jonathan S. *Homological independence of injective hulls of simple modules over certain noncommutative rings*, 377.
Goss, David. *A simple approach to the analytic continuation and values at negative integers for Riemann's zeta-function*, 513.
*Graff, Richard A. *A variant of the chain rule for differential calculus*, 155.
Greenleaf, Frederick P. See Corwin, Lawrence.
Gruenhage, G. See Gardner, R. J.
Grzegorek, E. and Ryll-Nardzewski, C. *On universal null sets*, 613.
Gudder, Stanley P. and Michel, John R. *Representations of Baer *-semigroups*, 157.
Gyllenberg, Mats. *A note on continuous dependence of solutions of Volterra integral equations*, 546.
Hagan, M. R. and Mahavier, W. S. *σ-coherent continua are hereditarily locally connected*, 129.
*Harris, Morton E. and Sibley, David A. *Generalizations of certain fundamental results on finite groups*, 654.
Harrold, O. G. *A remarkable simple closed curve: Revisited*, 133.
Hartfiel, D. J. *On the limiting set of stochastic products $xA_1 \cdots A_k$*, 201.
Hasanis, Thomas. *Characterization of totally umbilical hypersurfaces*, 447.
Henson, C. Ward and Wattenberg, Frank. *Egoroff's Theorem and the distribution of standard points in a nonstandard model*, 455.
Hill, Paul. *Quotients of valuated vector spaces*, 14.
Horadam, K. J. *A quick test for nonisomorphism of one-relator groups*, 195.
Howlett, Robert B. See Cartwright, Donald I.
Hurder, Steven. *On the homotopy and cohomology of the classifying space of Riemannian foliations*, 485.
Hwang, J. S. *On a problem of Lohwater about the asymptotic behaviour of Nevanlinna's class*, 538.
Isbell, John. *Product spaces in locales*, 116.
Izé, A. F. and Freiria, A. A. *Total stability for neutral functional differential equations*, 437.
Jajodia, Sushil. *On the two-realizability of chain complexes*, 125.
Johnson, F. E. A. *Two conjectures in the theory of Poincaré duality groups*, 353.
Jørgensen, Palle E. T. *Point-spectrum of semibounded operator extensions*, 565.
Kamowitz, Herbert. *On compact multipliers of Banach algebras*, 79.
*Kazdan, Jerry L. *Another proof of Bianchi's identity in Riemannian geometry*, 341.
Klein, Abraham A. *A new proof of a result of Levitzki*, 8.

Kluvánek, Igor. *Remarks on bimeasures*, 233.
Kobayashi, Yuji. *Another graded algebra with a nonrational Hilbert series*, 19.
Kofner, Jacob. *Transitivity and the γ-space conjecture in ordered spaces*, 629.
Kohn, M. J. *Spherical summability of differentiated multiple Fourier series*, 585.
Kon, Mark. See Diamond, Harvey.
Kreith, Kurt. *A Sturm theorem for partial differential equations of mixed type*, 75.
Krempa, Jan. *Simple subrings of algebras over fields*, 511.
Kurtz, Douglas S. and Wheeden, Richard L. *A note on singular integrals with weights*, 391.
Lai, Heng-Lung and Lue, Huei-Shyong. *Scalar curvature of Lie groups*, 311.
Lal, S. N. and Singh, K. N. *Generalised Lipschitz class of functions and the absolute summability of Fourier series by Nörlund means*, 41.
Landers, D. and Rogge, L. *Characterization of conditional expectation operators for Banach valued functions*, 107.
Legg, D. A. and Townsend, D. W. *Essential numerical range in $B(l_1)$*, 541.
*Lim, Teck-Cheong. *The center of a convex set*, 345.
Lin, T. F. *Quadratic integration of Gaussian processes*, 618.
Lue, Huei-Shyong. See Lai, Heng-Lung.
McCool, James. *A counterexample to conjectures of Papakyriakopoulos and Swarup*, 193.
McGibbon, C. A. *Some properties of H-spaces of rank 2*, 121.
*McKay, John. *Cartan matrices, finite groups of quaternions and Kleinian singularities*, 153.
McMullen, John R. See Cartwright, Donald I.
Mahavier, W. S. See Hagan, M. R.
Maksa, Gyula. *On near-derivations*, 406.
Martin, John R. *Fixed point sets of LC^∞, C^∞ continua*, 325.
Michel, John R. See Gudder, Stanley P.
van Mill, Jan. See van Douwen, Eric K.
Mohammad, Q. G. See Aziz, Abdul.
Morales, Claudio. *On the fixed-point theory for local k-pseudocontractions*, 71.
Mordeson, John N. See Deveney, James K.
Murty, K. N. See Rao, D. R. K. S.
*Mysior, A. *A regular space which is not completely regular*, 652.
Nakazi, Takahiko. *A note on the factorization of operator valued functions*, 591.
Osborne, Richard P. *Knots with Heegaard genus 2 complements are invertible*, 501.
Pach, A. J., Smith, M. A. and Turett, B. *Flat Orlicz spaces*, 528.
Pearce, Kent. *New support points of S and extreme points HS*, 425.
Pelletier, Donald H. *The partition property for certain extendible measures on supercompact cardinals*, 607.
Perkins, Edwin. *On the iterated logarithm law for local time*, 470.
Platt, C. R. *Finite transferable lattices are sharply transferable*, 355.
Pokrzywa, Andrzej. *Spectra of operators with fixed imaginary parts*, 359.
Polcino Milies, Cesar. *Group rings whose torsion units form a subgroup*, 172.
Powderly, M. *On insertion of a continuous function*, 119.
Proschan, Frank. See El-Neweihi, Emad.
Protter, M. H. *A lower bound for the fundamental frequency of a convex region*, 65.
Quinto, Eric Todd. *Topological restrictions on double fibrations and Radon transforms*, 570.
*Randol, Burton. *A remark on the multiplicity of the discrete spectrum of congruence groups*, 339.
Rangaswamy, K. M. See Boyer, D.
Range, R. Michael. *A remark on bounded strictly plurisubharmonic exhaustion functions*, 220.
Rao, D. R. K. S. and Murty, K. N. *Transformation of a class of non-self-adjoint eigenvalue problems*, 287.
Raphael, Louise. See Diamond, Harvey.
Rhemtulla, A. H. *Groups of finite weight*, 191.
———. *Finitely generated non-Hopfian groups*, 382.
Roehrig, Stephen F. and Sine, Robert C. *The structure of ω-limit sets of nonexpansive maps*, 398.
Rogge, L. See Landers, D.
Rosentrater, C. Ray. *Not every d-symmetric operator is GCR*, 443.
Rudin, Walter. *Holomorphic maps that extend to automorphisms of a ball*, 429.


Ruiz Salguero, Carlos and Ruiz Salguero, Roberto. *Characterization of the set-theoretical geometric realization in the noneuclidean case*, 321.
Ruiz Salguero, Roberto. See Ruiz Salguero, Carlos.
Ruscheweyh, Stephan. *Neighborhoods of univalent functions*, 521.
Ryll-Nardzewski, C. See Grzegorek, E.
Saab, Elias. See Ghoussoub, Nassif.
Saltman, David J. *The Brauer group is torsion*, 385.
Satyanarayana, M. *Finitely convergent and concentric semigroups*, 9.
Schachermayer, Walter and Weis, Lutz. *Almost compactness and decomposability of integral operators*, 595.
Schöneberg, R. See Baillon, J. B.
Schweigert, Dietmar. *Compatible relations of modular and orthomodular lattices*, 462.
Scott, Brian M. *A generalized Pressing-Down Lemma and isocompactness*, 316.
Sibley, David A. See Harris, Morton E.
Simis, A. See Andrade, J. F.
Sine, Robert C. See Roehrig, Stephen F.
Singh, K. N. See Lal, S. N.
Slodkowski, Zbigniew. *On subharmonicity of the capacity of the spectrum*, 243.
Smalø, Sverre O. *A limit on the Loewy length of the endomorphism ring of a module of finite length*, 164.
Smith, M. A. See Pach, A. J.
Smith, P. F. *Rings with every proper image a principal ideal ring*, 347.
Snider, Robert L. See Farkas, Daniel R.
Spiegel, Eugene. *Schur indices and the Galois group*, 189.
Srivatsa, V. V. *A remark on analytic sets with σ-compact sections*, 306.
Stanojević, Časlav V. and Suchanek, Ana M. *Integral identities of norms and characterization of inner product spaces*, 101.
Statman, R. *Speed-up by theories with infinite models*, 465.
Stone, David R. See Cheatham, Thomas J.
Stroth, G. *On standard subgroups of type* ${}^2E_6(2)$, 365.
Suchanek, Ana M. See Stanojević, Časlav V.
Swanson, R. C. See Chicone, Carmen.
Takahashi, Wataru. *A nonlinear ergodic theorem for an amenable semigroup of nonexpansive mappings in a Hilbert space*, 253.
Talagrand, Michel. See Bourgain, Jean.
Tewari, U. B., Dutta, M. and Vaidya, D. P. *Multipliers of group algebras of vector-valued functions*, 223.
Tomiuk, B. J. *Arens regularity and the algebra of double multipliers*, 293.
Townsend, D. W. See Legg, D. A.
Trent, Tavan and Wang, James Li-Ming. *Uniform approximation by rational modules on nowhere dense sets*, 62.
Tsagas, Gr. *Some properties of closed 1-forms on a special Riemannian manifold*, 104.
Turett, B. See Pach, A. J.
Vaidya, D. P. See Tewari, U. B.
*Vargas, Jorge. *A symmetric space of noncompact type has no equivariant isometric immersions into the Euclidean space*, 149.
Wallach, Nolan R. *The restriction of Whittaker modules to certain parabolic subalgebras*, 181.
Wang, James Li-Ming. See Trent, Tavan.
Ward, James R., Jr. *Asymptotic conditions for periodic solutions of ordinary differential equations*, 415.
*Watson, W. Stephen. *Pseudocompact metacompact spaces are compact*, 151.
Wattenberg, Frank. See Henson, C. Ward.
Weibel, Charles A. *K-theory of Azumaya algebras*, 1.
Weis, Lutz. See Schachermayer, Walter.
Wheeden, Richard L. See Kurtz, Douglas S.
Yamaguchi, Hiroshi. *On the product of a Riesz set and a small p set*, 273.
Yamashita, Shinji. *Length estimates for holomorphic functions*, 250.
Yost, David. *M-ideals, the strong 2-ball property and some renorming theorems*, 299.
